

Referral one-pager

Know a business stuck with unreliable IT, messy email, or a provider that never calls back? Send them our way. We will take care of them, and thank you for the introduction.

Who is a good fit

- Small and medium-sized businesses in the St. Louis area, plus remote-friendly teams nationwide.
- Teams on Microsoft 365 or Google Workspace that want day-to-day support they can reach.
- Owners who want plain-language advice, not a ticket farm.

How referrals work

1. Introduce us

Email

help@leveluptech.org

with their name and company, or have them mention you when they reach out.

2. We follow up

A short discovery call, a map of their stack, and a clear next step. No hard sell.

3. You get thanked

When a referred client signs a managed or project engagement, we send a thank-you gift or credit. Ask for the current offer.

No pressure

Referrals stay confidential unless you want an introduction email. We will not contact your list unsolicited.

What to tell them

“Level Up Tech is a small St. Louis IT shop for managed IT, Microsoft 365, Google Workspace, security, and networking. Start at **leveluptech.org** or email **help@leveluptech.org**.”
